

Muhammad Umar Farooq

Full-Stack Engineer — Web, Mobile & AI Products

Faisalabad, Pakistan · develop.umar@gmail.com · mumar.dev · github.com/mumar20 · linkedin.com/in/mumar20

SUMMARY

Full-stack engineer with 6+ years building and shipping production web, mobile, and AI-enabled products for startups and small businesses. Strong frontend craft across React / Next.js and Flutter, backed by dependable Node.js services and applied AI (retrieval and agentic workflows). I take products from first scope through launch, and lead a small team so client work ships on time.

EXPERIENCE

Independent Full-Stack Engineer — Freelance Practice 2024 - Present

- Design and ship production web, mobile, and AI-enabled products for startups and small businesses — from first scope through launch and iteration.
- Lead a small delivery team so client work ships on a real timeline, while staying hands-on across React, Next.js, Node.js, TypeScript, and Flutter.
- Built owned products end to end — FormPilot, Resumi, and Invoicery — including auth, billing, AI features, and shareable public links on Next.js + Postgres.

[Next.js](#) · [React](#) · [TypeScript](#) · [Node.js](#) · [Flutter](#) · [OpenAI / Vercel AI SDK](#) · [PostgreSQL](#)

Senior Full-Stack Engineer — Crave (Food-Tech) 2021 - 2024

- Built and maintained a multi-surface restaurant commerce platform end to end: customer web ordering, a merchant business manager, and a React Native order-manager app.
- Delivered shared Node.js services for orders, menus, payments, and live staff updates, with real-time features over Socket.IO and Stripe payments.

[Next.js](#) · [React](#) · [React Native](#) · [Node.js](#) · [Express](#) · [MongoDB](#) · [Socket.IO](#) · [Stripe](#)

Full-Stack / Frontend Engineer — Product & Agency Work 2019 - 2021

- Shipped responsive marketing sites, CMS-driven applications, reusable component systems, and client dashboards — building the frontend craft and delivery discipline the rest of my product work is built on.

SELECTED PROJECTS

FormPilot — AI-assisted form builder that turns each intake submission into a structured, actionable summary.

[Next.js](#) · [OpenAI](#) · [Stripe](#) · mumar.dev/case/formpilot

CraveUp — Restaurant Ordering & Management — Multi-surface commerce platform at Crave: web ordering, merchant manager, React Native order app, shared Node.js services.

[Next.js](#) · [React Native](#) · [Node.js](#) · [Stripe](#) · mumar.dev/case/craveup-restaurant-platform

AI Operations Copilot — Retrieval + agentic copilot over a hospitality company's documents, email, and POS data (client project, anonymized).

[LangGraph](#) · [OpenAI](#) · [Supabase](#) · mumar.dev/case/ai-ops-copilot

Plus a real-estate investment platform (Flutter + on-chain verification), a multi-vendor marketplace, a U.S. business-formation SaaS, and a multi-location ordering platform — full case studies at mumar.dev/work.

CORE SKILLS

FRONTEND

[React](#), [Next.js](#), [TypeScript](#), [Tailwind CSS](#)

BACKEND

[Node.js](#), [Express](#), [PostgreSQL](#), [MongoDB](#), [Supabase](#), [Prisma](#)

MOBILE

[Flutter](#), [React Native](#)

AI

[OpenAI](#), [Vercel AI SDK](#), [LangChain / LangGraph](#), [RAG & agentic workflows](#)

CLOUD & TOOLS

[AWS](#), [Vercel](#), [Stripe](#), [Clerk](#), [Git](#)

HIGHLIGHTS

- 6+ years shipping production products
- Senior full-stack at Crave (food-tech), 2021-2024
- 10 documented case studies — 4 owned, live products
- End-to-end delivery across web, mobile & AI
